DESCRIPTION OF COURSE

University: University of Economics in Bratislava	
Faculty: Faculty of Economics and Finance	
Course code: KBaMF NHF/ NNC21001e/21	Title of course: Commodity markets and real investments
Type, load and method of teaching activities: Form of course: Lecture Recommended load of course (number of lessons): Per week: Per course: 24s Method of study: present	
Number of credits: 6	
Recommended semester/trimester of study: 5.	
Degree of study: I.	
Prerequisites:	
Requirements to complete the course: 15% team portfolio management 25% work on team assignments 60% written exam	
Student workload: - 24 hours – consultations - 46 hours – preparation for consultations - 86 hours – preparation for written exam	
Teaching results: Knowledge: <ul style="list-style-type: none"> - Understanding of basic mechanisms of commodity markets functioning - Understanding of basic relations between commodity markets and the global economy - Understanding of basic relations between commodity markets and individual segments of the financial markets - Understanding of real asset market specifics - Understanding of basic fundamentals affecting individual segments of commodity markets (energies, precious metals, industrial metals, agricultural commodities) and real asset markets (gems, arts artworks and collectibles, realties, water and emmission quotas) - Understanding of mechanism of functioning of financial tools used on commodity and real asset markets. Skills: <ul style="list-style-type: none"> - The ability to systematically collect and evaluate information related to commodity and real asset markets - The ability to use technical and fundamental analysis for predicting the future commodity and real asset markets development - The ability to create a commodity and real asset-focused investment portfolio based on the analysis of available data Competencies: <ul style="list-style-type: none"> - The teamwork ability - The critical thinking ability 	

- The analytical thinking ability
- The ability to present the results of own analyses

Indicative content:

1. Commodity markets and their position in the real economy. Classification of commodities. The impact of macroeconomic factors on commodity markets. Influence of external factors on commodity markets. Cycles in commodity markets. The relationship between commodity and stock markets
2. Trading on commodity markets. The most important commodity exchanges. Types of trades on commodity markets. Options of investing in commodities. Commodity market investment tools
3. Mining companies and risks in commodity markets. Types of mining companies. The life cycle of a mining company from the investor's point of view. Financing of mining projects. Risks on commodity markets
4. Energy commodities. Global energy market. The most important energy commodities (oil, natural gas, coal, uranium). The main fundamental factors of individual energy markets. Specifics of investing in energy commodities. Green energetics
5. Precious metals. Classification of precious metals (gold, silver, platinum group metals). The specific position of gold in the world economy. The main fundamental factors of individual segments of the precious metals market. Specifics of investing in precious metals
6. Basic industrial metals. Classification of basic industrial metals (iron ore and steel, aluminum, copper, etc.). The main fundamental factors influencing the markets of individual metals. The relationship between basic industrial metals and the global economy. Specifics of investing in basic industrial metals
7. Special industrial metals. Classification of special industrial metals. Battery metals. The main fundamentals of special metals markets. Specifics of investing in special metals
8. Agricultural commodities. Classification of agricultural commodities (cereals, oilseeds, animal products, etc.). Strategic importance of agricultural commodities. Agricultural commodities and weather. Specifics of investing in agricultural commodities
9. Precious stones. Classification of precious stones. Diamond market, pricing specifics and 4C. Specifics of other gemstone markets (emerald, ruby, sapphire, precious opal)
10. Art and collectibles. Different types of art and specifics of the art market. Artworks as an alternative investment asset. Numismatics, notaphilia and philately. Other economically meaningful collector assets
11. Land and real estates. Classification and specifics of the real estate market. Specifics of the land market. Real estates as an alternative investment asset
12. Water and emission quotas. Water as a strategic raw material. Water as an investment asset. Water indices. Kyoto Protocols and Emissions Allowance Mechanisms. Emission allowances as a specific investment asset
13. Development tendencies in commodity markets. Green energy and commodity markets. Electromobility and commodity markets. Global climate change and commodity markets

DESCRIPTION OF COURSE

University: University of Economics in Bratislava	
Faculty: Faculty of Economics and Finance	
Course code: KET NHF/ NNE21022e/22	Title of course: Development of Economics
Type, load and method of teaching activities: Form of course: Lecture Recommended load of course (number of lessons): Per week: Per course: 16s Method of study: present	
Number of credits: 3	
Recommended semester/trimester of study: 8.	
Degree of study: I.	
Prerequisites:	
Requirements to complete the course: Concurrent assessment – 40 % Final exam – 60 %	
Student workload:	
Teaching results: Knowledge The aim of the course is to make students to understand how economics has evolved as an independent scientific discipline in which there are differences of opinions on the same economic problems. The development of economic science shows how new hypotheses and theoretical approaches have emerged responding to developments in real economies. Knowledge of the development of economics will help students to understand alternative methodological approaches and their implications, different views on the functioning of the economy and their implications for the development of policy alternatives. Knowledge of the development of economics also contributes to the formation of a systematic approach to economic analysis at the macro and micro levels.	
Indicative content: 1. The emergence and development of economics as a scientific discipline, classical school of economics, 2. Heterodox economic theories of 19th century, 3. Marginalist revolution in economics - the emergence of modern microeconomics and its methodology, 4. The development of consumer theory and theory of the firm, 5. Theoretical approaches to the firm, game theory and its impact on microeconomic analysis, 6. 2nd generation of Austrian economics (F. A. von Hayek, Ludwig von Mises) and their views on social and economic development, 7. The emergence of modern macroeconomics, economic theory of J. M. Keynes, 8. Methodological contribution of Keynesian economics and the implications for economic policy, 9. Economic theory of monetarism, methodological assumptions of monetarism, implications of monetarism for economic policy, 10. New classical macroeconomics and its contribution to the development of macroeconomics,	

11. Heterodox economic theories of 2nd half of 20th century, supply side economics,
12. Institutional and new institutional approach to economics, its methodology, contribution and implications for the functioning of the economy,
13. Current trends in the development of economics.

They will gain the following skills:

1. They will increase their social skills in the field of the active listening, receiving and giving feedback, negotiation, leadership and coaching.
2. They will gain experience in problem solving, strategic analysis, change management and the creation of system of motivation and evaluation.
3. They will gain basic skills in writing projects.

Indicative content:

The aim of the course is for students to acquire professional competencies in the field of personnel management as well as human resources management and to learn to respect their main principles and laws at all levels of society. Also, to deepen their skills in the field of self-organization and individual development as well as in achieving the progress of organizations.

Students will gain the skills needed for managers, executives as well as human resources experts.

The individual professional competencies of this course are formed into roles, which are:

1. The role of personnel manager and human resources manager

Identification of personnel management and human resources management. Understanding their differences on a theoretical as well as a practical level.

2. The role of the manager.

Aimed at understanding the various components of the organization, which are: values, goals, structure, climate and environment. This role also includes knowledge of organizational culture and its typology.

3. The role of the rhetoric.

It represents basic interpersonal skills focused on the attributes of communication, verbal and nonverbal communication, active listening, feedback, effective and assertive communication.

4. The role of the negotiator.

It represents higher interpersonal abilities, which include negotiation, influencing, negotiation and its regularity.

5. The role of leader.

Differences in management of leader and manager. Conflict resolution in the workplace, characteristics of the social group and work team, stages of group development (chaotic stage, formal stage and developed stage).

6. The role of a coach.

Perception of coaching as a higher form of leadership. Coaching functions (counseling, mentoring, tutoring and confronting), coaching methods. Problem solving through coaching. Coaching yourself and others.

7. Human resource developer.

Analysis of strengths and weaknesses of personality. Positive acceptance of yourself and others. Knowledge of your own leadership style, its advantages and disadvantages. Effective time management and organization. Analysis of the potential of others. Identification of training needs for personal development.

8. The role of the motivator.

Selected theories of motivation. Maslow's hierarchy of needs, Alderfer's theory of needs, Herzberg's theory of needs, Expectation theory, McGregor's theory. Increasing motivation through project design.

9. The role of the evaluator.

Evaluation as a process. Evaluation criteria. Subjects, methods, principles of evaluation. Methods of work evaluation and assessment. Remuneration components. Employee benefits.

10. The role of strategist

Fundamentals of strategic management. The environment of the organization and its evaluation. Application of SWOT and STEEP analysis.

11. The role of the actor of change.

Perception of change, typology of changes. Elimination of resistance to change. Managing change through 5 steps: analysis of the forces leading to change, diagnosis of the problem, identification of methods of change, strategy of change, implementation and evaluation.

12. The role of the project manager.

Project and its form. Project life cycle stages. Project leader and his professional competencies. Logical framework of the project. Methods and forms of the project evaluation.

During the seminars, students solve practical tasks in which new methods of education are applied, such as case studies, role-playing, problem-solving exercises and they will gain basic skills in writing projects.

DESCRIPTION OF COURSE

University: University of Economics in Bratislava	
Faculty: Faculty of Economics and Finance	
Course code: KET NHF/ NNE21002e/21	Title of course: Principles of Economics 2
Type, load and method of teaching activities: Form of course: Lecture Recommended load of course (number of lessons): Per week: Per course: 24s Method of study: present	
Number of credits: 6	
Recommended semester/trimester of study: 2.	
Degree of study: I.	
Prerequisites:	
Requirements to complete the course: Requirements to complete the course: individual work, written test, written exam Seminars 40 %, of which: Activity at the seminar 15 % Elaboration and presentation of a case study 5 % Written tests from quantitative and graphic tasks 20 % Result of the final written exam 60 %	
Student workload: Total study load (in hours): Total student workload: 156 hours. Of which: Attendance at lectures: 26 hours Attendance at seminars: 26 hours Preparation for seminars: 13 hours Elaboration of a case study in the form of team cooperation: 18 hours Preparation for written tests of quantitative and graphical tasks: 21 hours Preparation for the exam: 52 hours	
Teaching results: Knowledge: Completion of the course enables students to master the basic macroeconomic concepts and understand macroeconomic context. The students will be able to systematize the knowledge of macroeconomics in relation to the courses such as economic policy, public finance, social policy and public administration. Competences: The students will gain the ability to think like the economist and understand macroeconomic concepts, indicators, policies and issues and apply knowledge of macroeconomics to events in the economy. Skills:	

The students get the ability to search, process and analyze macroeconomic data gained from relevant resources and evaluate macroeconomic development. In tutorial, students are expected to work not only individually but also in teams. The students learn how to discuss and present their arguments.

Indicative content:

Gross domestic product. Alternative approaches to measurement of economic performance.
 Aggregate demand and aggregate supply. Model AD-AS.
 Consumption, savings and investment.
 Economy in long-run: economic growth.
 Economy in short-run: economic cycle.
 Money, money market and banking system.
 Inflation.
 Unemployment and Phillips curve.
 Macroeconomic approaches to economic policy.
 Fiscal policy.
 Monetary policy.
 International trade. International flows goods, services and capital.
 Exchange rate mechanism and international monetary relations.
 International economic integration.

DESCRIPTION OF COURSE

University: University of Economics in Bratislava	
Faculty: Faculty of Economics and Finance	
Course code: KF NHF/ NNB21003e/21	Title of course: Public Finance
Type, load and method of teaching activities: Form of course: Lecture Recommended load of course (number of lessons): Per week: Per course: 24s Method of study: present	
Number of credits: 6	
Recommended semester/trimester of study: 4.	
Degree of study: I.	
Prerequisites:	
Requirements to complete the course: 20 % midterm test, 20 % assignment, 60 % final exam	
Student workload: Consultations 24 h, Preparation for consultations 26 h, Preparation of assignments 26 h, Preparation for midterm test 26 h, Preparation for final exam 54 h	
Teaching results: <ul style="list-style-type: none"> • Skills: Students will be able to articulate and evaluate theories about the role of government in the economy, particularly regarding taxation and expenditure programs. • Knowledge and understanding: Students will demonstrate knowledge of empirical analysis on the effects of government policies on economic outcomes. Students will be able to use this knowledge to develop their own fact-based positions on political issues. • Competence: Students will demonstrate knowledge of specific institutions in the US which are related to government taxation and expenditure programs. This knowledge will prepare students for jobs in the fields of public policy, economics, and business. 	
Indicative content: This course examines the role of the public sector in the economy with an emphasis on government expenditure programs and tax policy. The aim of the course is to provide an understanding of the nature of government intervention in the economy and the response of individuals and firms to government programs and policies. The course explores both theoretical models and empirical evidence. <ol style="list-style-type: none"> 1 Introduction to Public Finance 2 Theoretical Tools and Empirical Tools of Public Finance 3. DESCRIPTION OF COURSE

University: University of Economics in Bratislava	
Faculty: Faculty of Economics and Finance	
Course code: KVSaRR NHF/ NNG21004e/21	Title of course: Regional Economics and Policy
Type, load and method of teaching activities: Form of course: Lecture Recommended load of course (number of lessons): Per week: Per course: 24s Method of study: present	
Number of credits: 6	
Recommended semester/trimester of study: 7.	
Degree of study: I.	
Prerequisites:	
Requirements to complete the course:	
Student workload:	
Teaching results: Knowledge - By completing the course the student will understand the economic principles behind the growth and development of regions and the possibilities of public policy to influence these processes. The graduate will have an overview of basic data sources for individual economic analyzes. Skills - Will gain practical skills in localization analysis, analysis of spatial concentration of economic activities, analysis of the industrial structure of regions, analysis of the multiplication process of exports and analysis of the process of regional convergence. He will acquire these skills either by working with empirical data or by working with stylized examples. Competences - Using the acquired knowledge and skills will be able to identify appropriate economic tools to address problem areas in regional development from the perspective of regional policy.	
Indicative content: The course is divided into three problem areas. The first part provides a basic overview of the microeconomic principles of business localization. The second part of the course explains the principles behind the mobility of production factors and the basic mechanisms of regional economic growth in terms of neoclassical and Keynesian concepts as well as in terms of endogenous growth theory. The third part of the course is devoted to the rationale and possibilities of public interventions in the regional development. <ol style="list-style-type: none"> 1. Spatial structure of the economy. 2. Economic principles of firm localization 3. Interfirm competition and localization of companies 4. Agglomeration economies and diseconomies 5. Principles of regionalization. Regional economic growth vs. development. 6. Regional economic growth in the long run (labor, capital and mobility of production factors) 7. Regional economic growth in the long run (interregional trade) 8. Long-term regional economic growth (human capital and technology) 9. Regional economic growth in the short term (external demand and export multiplier) 	

- 10. Regional policy (definition, instruments)
- 11. Regional policy of the Slovak Republic
- 12. EU cohesion policy

DESCRIPTION OF COURSE

University: University of Economics in Bratislava	
Faculty: Faculty of Economics and Finance	
Course code: KPOI NHF/ NNS21001e/21	Title of course: Risk Management and Insurance
Type, load and method of teaching activities: Form of course: Lecture Recommended load of course (number of lessons): Per week: Per course: 24s Method of study: present	
Number of credits: 6	
Recommended semester/trimester of study: 4.	
Degree of study: I.	
Prerequisites:	
Requirements to complete the course: 20% mid-term test, 20% group and teamwork assignments, 60% written exam	
Student workload:	
Teaching results: After successful completion of this course, students will have knowledge of: - understanding the basics of risk and the possibilities of its management for individuals as well as legal persons - understanding the risk management process, including its phases, steps and tools Practical skills and competencies consist in the ability to: - identify relevant risk management methods for the specific situations - understand the basic methods and tools of risk management, their advantages and disadvantages depending on the financial capabilities of the entity and other circumstances - apply relevant and effective risk management methods to the specific situations - analyze, interpret and compare types of insurance coverage, as well as other forms of risk transfer	
Indicative content: The aim of the course is to familiarize students with the basic issues of risk management and insurance. The course focuses on the theoretical aspects of the definition of the risk, its classification and analysis from the perspective of various scientific disciplines. Attention is focused on risk management with an emphasis on insurance as a traditional risk management tool. The second group of problems is a closer analysis of the principles of insurance, including an analysis of types of insurers and their marketing systems, insurance regulation and pricing of insurance products. The course offers an opportunity to understand the basics and processes of life and non-life insurance.

DESCRIPTION OF COURSE

University: University of Economics in Bratislava	
Faculty: Faculty of Economics and Finance	
Course code: KSRaP NHF/ NNF21010e/21	Title of course: Social Policy
Type, load and method of teaching activities: Form of course: Lecture Recommended load of course (number of lessons): Per week: Per course: 24s Method of study: present	
Number of credits: 6	
Recommended semester/trimester of study: 5.	
Degree of study: I.	
Prerequisites:	
Requirements to complete the course: 10% active participation in professional discussion, 30% presentation output from a case study, 60% exam	
Student workload:	
Teaching results: The aim of the course is to equip students with knowledge and basic analytical skills in relation to the main areas of interest of social policy as a scientific discipline and as a practical activity in a changing socio-economic environment. The student will gain the ability to independently perceive and analyze social problems and critically evaluate the proposed methods of their solution. To lead students to understand the relationship and application of criteria of economic and social efficiency in relation to various entities in the process of creating and implementing social policy. The subject is based on social theory, explains the types of social policy and develops basic knowledge of the theory and practice of social policy through knowledge about the functions of social policy, its social and economic conditionality, its principles, content and specific tools in our country and abroad. After completing the course, the student should be able to: Knowledge and understanding - understand the values, principles, and goals of social policy - be familiar with the theories, legislation, concepts and strategic documents related to the issue - be familiar with social policy identifiers in qualitative form, which will make it possible to examine economic phenomena from a quantitative point of view - understand the principles of functioning of social policy models - apply knowledge in practical situations and take a creative approach to solving specific social situations - understand socio-economic relations for their effective application in economic practice - to gain knowledge about the types, manifestations, structure and dynamics of social problems on a national, regional scale and about the relations between them - to gain knowledge about sources of information, methods of data collection and processing in the social field - synthesize the basic features of social theory in relation to the European environment Competence	

- ability to work independently with studies related to social policy
- openness to perception and interpretation of social phenomena and problems
- the ability to take the social aspect into account when solving practical economic problems

Skills

- apply the right methods, procedures and techniques in specific social situations in the field of creation as well as implementation of social policy
 - identify the responsibility of specific institutions according to competencies for social problems
 - interpret the results of analyzes in the social field
 - the ability to identify individual social benefits for beneficiaries in specific life situations
- discuss social problems and their possible solutions
