DESCRIPTION OF COURSE

| | |
|---|--|
| University: University of Economics in Bratislava | |
| Faculty: Faculty of Commerce | |
| Course code: KMr OF/OOA21256e/21 | Title of course: Business in Practice 2 |
| Type, load and method of teaching activities: Form of course: Lecture Recommended load of course (number of lessons): Per week: Per course: 12s Method of study: present | |
| Number of credits: 4 | |
| Recommended semester/trimester of study: 5. | |
| Degree of study: II. | |
| Prerequisites: | |
| Requirements to complete the course: Teamwork. Term project. Final presentation. Rating: 10% partial presentations 30% processing of semester work 60% final presentation and answers to questions from practice and faculty representatives. | |
| Student workload: Number of credits: 4 Participation in seminars: 26 h Processing of the semester project: 52 h Preparation for seminars: 26 h | |
| Teaching results: Outcomes: Students will gain the ability to understand and analyze the basic management processes taking place in the subjects of economic practice operating in the field of trade, marketing, international trade and business, tourism and services and analyze them. They will gain knowledge of approaches to coordination and management of middle and senior management activities. They will gain knowledge of project management. Practical skills: Students will be able to identify and apply the tools of middle and senior management in the specific conditions of the selected subject of economic operations. They acquire the ability to decide and propose solutions to projects and problems at the operational and tactical level. They will be able to critically evaluate alternative solutions to problems in trade, marketing, international trade, tourism and services. Competencies: Students will gain the ability to delegate competencies in the management of a selected entity. They will be able to design and delegate activities under alternative scenarios. They can divide the tasks of teamwork at the tactical and strategic level of the selected entity. | |

Knowledge, practical skills and competencies may differ according to the profile of the graduate and the educational goals of the study program in which the subject is taught.

Indicative content:

Entrepreneurship in practice is focused on the comprehensive practical performance of the student, which is realized in several forms, such as solving projects (project-based learning) in a selected club in the segment of international trade, tourism or marketing and business management. Furthermore, it can be participation in an ERASMUS + study or ERASMUS practice, or another suitable form chosen by the teacher in coordination with the representative of economic practice, including a visit to the workplace or workplaces of a practice partner.

DESCRIPTION OF COURSE

| | |
|--|---|
| University: University of Economics in Bratislava | |
| Faculty: Faculty of Commerce | |
| Course code: KMr OF/OOA21246e/21 | Title of course: Digital Marketing |
| Type, load and method of teaching activities: Form of course: Lecture Recommended load of course (number of lessons): Per week: Per course: 24s Method of study: present | |
| Number of credits: 5 | |
| Recommended semester/trimester of study: 2. | |
| Degree of study: II. | |
| Prerequisites: | |
| Requirements to complete the course: 20 % - continuous assignments 20% - semestral test 60 % - final exam | |
| Student workload: Total study load: 130 hours Consultation participation: 26 hours Self-study: 30 hours Continuous assignments: 24 hours Preparation for semestral test: 24 hours Preparation for final exam: 26 hours | |
| Teaching results: Students gain an overview of the subject in digital marketing channels and the possibilities of their use in the company's marketing mix. The course identifies digital communication channels and deals with the most used ones. The student gains theoretical knowledge and practical experience with the purchase of Internet media space, approaches to search engine optimization, content and performance management of social networks, affiliate marketing and other digital marketing channels. The graduate of the course will be oriented in the possibilities of digital marketing communication, will master the concepts of digital marketing, will be able to communicate with agencies and suppliers of digital marketing services and will be able to set a comprehensive digital strategy to fulfill a defined business plan. The application of the graduate of the course is in a wide range of companies that present themselves even partially on the Internet, that use the Internet for sales and marketing communication, or that obtain information on the Internet for strategic decisions. | |
| Indicative content: The course identifies available digital channels and explains approaches to their use for digital marketing. The student acquires orientation in the current possibilities of creating an online presence, display advertising, content distribution across available digital channels, search engine marketing, marketing in advertising networks (GDN), search engine optimization (SEM) and native advertising. The course also focuses on programmatic purchasing, RTB (real-time-bidding) | |

networks, affiliate marketing, e-mailing, data mining, processing and application of big data for the needs of digital marketing and the automation of marketing processes.

DESCRIPTION OF COURSE

| | |
|---|--|
| University: University of Economics in Bratislava | |
| Faculty: Faculty of Commerce | |
| Course code: KOP OF/OOE21063e/21 | Title of course: Law in Marketing |
| Type, load and method of teaching activities: Form of course: Lecture Recommended load of course (number of lessons): Per week: Per course: 24s Method of study: present | |
| Number of credits: 4 | |
| Recommended semester/trimester of study: 2. | |
| Degree of study: II. | |
| Prerequisites: | |
| Requirements to complete the course: 10 % active participations in seminars 10 % project presentation (presentation of semestral theses) 20 % semestral written test 60 % final written test | |
| Student workload: Study load: 104 Participation in seminars: 13 Preparation for seminars: 13 Preparation for project presentation (presentation of semestral theses): 19 Preparation for semestral written test: 19 Preparation for final written test: 40 | |
| Teaching results: After completing the course, the student has practical legal information in the field of marketing management, marketing communication, product management, public relations, IT and trade. Knowledge: In a broader context, the student understands more complex legal institutes that relate to marketing and business activities in general, especially in the following areas: <ul style="list-style-type: none">- marketing management and marketing communication,- product management,- public relations,- IT technologies in marketing and- trade. Practical Skills: The student understands that the regulation of marketing and business activities is subject to legal regulation, both private law and public law. He/she understands the latest trends in legal regulation and knows how to follow them (European regulation). In a broader context, he/she understands the complexity of the legal regulation of selected marketing and business activities (e.g. online marketing includes aspects of licensing agreements, personal data protection, intellectual property protection, but also the regulation of infrastructure and media). He/she can write a simple contract and identify its essentials. | |

Competencies:

The student will gain the ability to work with applicable legislation governing marketing and business activities. The student is also able to work with databases of European legislative acts (<https://eur-lex.europa.eu>) and Slovak legislation (www.slov-lex.sk), can find the relevant legislation concerning the regulation of marketing and business activities and can read it with the knowledge of basic legal concepts and institutes.

Indicative content:

- intellectual property law
- media law (Act on advertising, Act on audiovision, Act on Broadcasting and Retransmission, Press act etc.),
- protection of personal rights,
- protection of personal Data (GDPR)
- unfair competition
- legal regulation of e-commerce and IT,
- retail sales legislation,
- distribution and logistics regulation,
- legal regulation of the market introduction of products,
- legal regulation of pricing,
- basic contract types used in the field of marketing consulting and communication, public relations and trade

DESCRIPTION OF COURSE

| | |
|--|--|
| University: University of Economics in Bratislava | |
| Faculty: Faculty of Commerce | |
| Course code: KMr OF/OOA21247e/21 | Title of course: Management in Distribution |
| Type, load and method of teaching activities: Form of course: Lecture Recommended load of course (number of lessons): Per week: Per course: 24s Method of study: present | |
| Number of credits: 8 | |
| Recommended semester/trimester of study: 2. | |
| Degree of study: II. | |
| Prerequisites: | |
| Requirements to complete the course: 20% semester work 80% written exam | |
| Student workload: Workload: 208 hours Attendance at lectures: 24 hours Self-study: 60 hours Semester project processing: 54 hours Preparation for the exam: 70 hours | |
| Teaching results: By completing the course, students gain knowledge about the importance of decision-making in distribution and logistics, the nature and main tasks of distribution management and its connection to other processes of marketing management. They will get acquainted with the basic areas of decision-making and individual types of decisions at the acquisition and logistics level of the distribution system. They will gain an overview of the formalization of the decision-making process, its algorithmization and the application of basic decision-making criteria in the selection of the most suitable alternatives for the implementation of decisions. They will gain knowledge about decision-making in assortment policy, retail sales policy, retail localization policy, basic methods of territorial analysis of retail, criteria for evaluation of distribution channels and distributors in these channels, institutionalization of conflict management, as well as main social and partnership relations and their manifestations in distribution systems. Graduates of the course will be able to prepare and then implement the necessary decisions in the field of acquisition and logistics distribution system, will be able to evaluate the main factors affecting the implementation of these decisions, use the results of marketing analysis, plans and strategies and transform them into appropriate decisions. They will understand the importance of distribution controlling in the process of evaluating the effectiveness of decisions taken and their effectiveness. They understand a comprehensive marketing and technical-technological system for evaluating the performance of the distribution system as a whole. Upon successful completion of the course, students will acquire competencies that will allow them to apply in managerial positions, especially manufacturing and business enterprises, in solving the tasks of distribution management. They will apply as managers in various organizational concepts | |

| |
|---|
| <p>of distribution management - as distribution channel managers, product managers or customer managers. They can solve problems of strategic and operational nature in the territorial analysis of retail and the selection of a suitable location for retail. They will acquire professional flexibility and acquire a systematic, innovative and proactive approach to various situations, their evaluation and solution.</p> |
| <p>Indicative content: The nature and tasks of distribution management. Areas of decision-making on distribution policy. Decision-making on the acquisition and logistics distribution system. Situational analysis in distribution, distribution goals and strategies, organization of distribution system. Outsourcing in distribution and logistics. Distribution system as an economic and social system. Distribution controlling.</p> |

| Teaching results: Knowledge: Graduates of the course will learn to work with the most complex and at the same time the most important stage of marketing management, which is a decision-making. The graduate of the course will gain knowledge about qualitative and quantitative methods used in marketing management. The subject is taught in seminars on the basis of solving practical situations with a focus on the chosen industry (e.g., decide on which segments the company should focus on, whether advertising will be effective for the company in relation to costs; similar situations). Graduates will also be introduced to simple predictions in marketing. Competences: The graduate will be able to formulate a research question and design a research for its examination using empirical methods. They will be able to make decisions based on data analysis and will be familiar with individual marketing areas and tools. Skills: The graduate can decide on the choice of method of data collection and their detailed analysis. They will master the methods of data processing, can use R software for their decision-making in empirical research. They will be able to independently develop their knowledge in statistical methods and to use modern software, understand empirical studies in marketing and be able to use them in new areas. | |
| Indicative content: | |

The concept and essence of decision making, situations in decision making. Qualitative methods: brainstorming and its modifications, creative techniques, Delphi method, scenarios. Quantitative methods: logistic regression, decision trees, factor analysis, cluster analysis. Predictions in time series.

DESCRIPTION OF COURSE

| | |
|---|--|
| University: University of Economics in Bratislava | |
| Faculty: Faculty of Commerce | |
| Course code: KMr OF/OOA21253e/21 | Title of course: Quality Management |
| Type, load and method of teaching activities: Form of course: Lecture Recommended load of course (number of lessons): Per week: Per course: 24s Method of study: present | |
| Number of credits: 5 | |
| Recommended semester/trimester of study: 4. | |
| Degree of study: II. | |
| Prerequisites: | |
| Requirements to complete the course: 40% team presentation of a semester project 60% written exam | |
| Student workload: Workload: 130 hours Attendance in consultations /seminars: 24 hours Preparation for seminars: 24 hours Preparation of a semester project: 12 hours Preparation for the exam: 70 hours | |
| Teaching results: Knowledge By completing the course, students gain knowledge about the importance, historical development and trends in the future direction of quality management; accordingly on quality management and assurance principles, tools or methods; on the interrelationship between quality management and international ISO standards; or the application of quality management standards on the example of specific industries - e.g. automotive industry. Skills Students' skills are demonstrated by their understanding of the nature and importance of the integration of quality management systems, environment and occupational safety/health; mastering basic concepts and approaches of quality management (e.g. TQM = Total Quality Management); understanding the requirements of ISO 9001, 14001, 45001 and the ability to implement them in practice; respectively the ability to identify possible economic benefits of applying quality management systems. Competences By completing the course, students will acquire competences related to the process of applying individual tools and techniques of quality management in practice; or using the acquired knowledge related to the importance of the human factor - employees and customers - in the process of quality management (for example, in measuring customer satisfaction, as one of the starting points for quality assurance/improvement). | |
| Indicative content: | |

The course deals with the issue of quality management - its essence, importance and trends in the future; quality standards; diverse quality management concepts, methods and tools; the importance of the human factor - employees and customers - in the process of quality management and assurance; and, last but not least, the interrelationships and links between quality, environmental and occupational safety management.
