

Description of the study programme – outline¹ (only for doctoral study programme)

Name of the higher education institution	University of Economics in Bratislava	
Address of the higher education institution	Bratislava, Dolnozemska cesta 1	
Identification number of the higher education institution	00399957	
Name of the faculty	Faculty of National Economy	
Address of the faculty	Dolnozemska 1, 852 35 Bratislava	
Institution body for approving the study programme	Council for Internal Quality Assessment at the EU in Bratislava	
Date of the study programme approval or the study programme modification		
Date of the latest change in the study programme description (If the change is not a modification of the study programme according to § 30 of Act no. 269/2018 Coll.)	X	
Reference to the results of the latest periodic review of the study programme by the institution	X	
Reference to the assessment report of the application for accreditation of the study programme under § 30 of Act no. 269/2018 Coll. (It is stated only if the accreditation of the study programme has been granted according to § 30 of Act no. 269/2018 Coll.)	X	
1. Basic information about the study programme		
Name of the study program and its number according to the register of study programmes	Economics	
Degree of higher education and ISCED-F education degree code²	3. degree – 864	
Place(s) of delivery of the study programme	Bratislava	
Name and number of the field of study in which higher education is obtained by completing the study programme, or a combination of two fields of study in which higher education is obtained by	8 – Economics and Management 0311 Economics	

¹ The institution compiles a description of the study programme as an annex to the application for accreditation of the study programme.

- When submitting an application pursuant to § 30 (1) of Act no. 269/2018 Coll. the higher education institution states in the description only the data available at the time of application.
- Once the accreditation (or the internal approval of the study programme by the institution programme approval authority with the right to design programmes within the given field and degree) has been granted, the institution permanently makes the description available to the stakeholders of the study programme.
- The institution may choose the form of processing, visualization, and publication of the description, suitable for students, teachers and other users.
- In individual parts of the description, the institution may refer to another internal document that sufficiently describes the relevant area and is publicly available.
- In individual parts of the description, the institution may refer to a place in the information system which contains the relevant up-to-date information.
- The institution ensures that the description is up-to-date (if the change in the description is in the nature of a modification of the study programme and the change is made in accordance with § 30 (9) of Act No. 269/2018 Coll., the institution makes the change and publishes it only after approval by the Agency).

² Code 768 is used in the case of study programs with the degree of "master" and the possibility to take a rigorous examination

completing the study programme, ISCED-F codes of the field/fields		
Type of the study programme		The academically oriented study program
Awarded academic degree		Philosophiae doctor („PhD.“)
Form of study		Full-time study
In the case of joint study programmes, cooperating institutions and the range of study obligations the student fulfills at each of the given institutions (§ 54a of the Act on Higher Education Institutions).	x	
Language or languages in which the study programme is delivered³		English language
Standard length of the study expressed in academic years		3. degree – 3 years
Capacity of the study programme (planned number of students)		10
The actual number of applicants		x
The actual number of students		x
2. Graduate profile and learning objectives⁴		
Graduate profile	<p>The study program Economics prepares graduates capable of conducting original research at the frontier of knowledge from an international perspective, addressing the fundamental economic issues of our time. Its graduates have a thorough knowledge of economics and its applications in various fields, the ability to think systematically and can creatively use quantitative methods to solve fundamental economic problems. They acquire skills and competencies from leading economists and at the same time develop their own research program. They will find their application in academic positions in the international environment, in executive positions in the public sector, as the main executives in the private sector, but also in renowned research and international organizations. They can gain positions at universities, as researchers in central banks and other domestic and international institutions, or as consultants or other professionals in the private sector. The university's extensive international ties allow students to attend courses taught by experts from leading universities around the world (such as University of Vienna and WU Wien, University of Coimbra, CERGE-EI, Chapman University) in addition to internationally recognized domestic university teachers. Students devote themselves independently to the original research program, which is closely supervised and led by faculty members. In this regard, they cooperate mainly with their supervisor. Regular research seminars with invited foreign experts, a doctoral research seminar, and other academic activities contribute to their own development towards a personality who can take responsibility for conducting research in a given scientific or professional field, present research results to the international professional community, and contribute to the development of the society in the context of scientific and technical progress.</p> <p>The study program is taught in English. It prepares graduates who are competitive in the international labor market. It reflects the fact that economic research at the European level is conducted in English. It contributes to the internationalization and openness of education at the UEBA Faculty of National Economy. It takes place through international cooperation with partner institutions, active involvement of foreign professors and lecturers in teaching and research activities and seminars of doctoral students.</p>	
Learning objectives	1. Systematic knowledge of economics	

³ It means the languages in which all learning outcomes are achieved and all related courses of the study programme as well as the state examinations are carried out. The institution independently provides information on the possibility of partial study parts/courses in other languages in part 4 of the description.

⁴ Learning objectives are achieved in the study programme through measurable learning outcomes in individual parts (modules, subjects) of the study programme corresponding to the relevant level of the Qualifications Framework in the European Higher Education Area

(student's abilities at the time of completion of the programme and the main learning outcomes)	<ol style="list-style-type: none"> 1.1. Graduates have a systematic knowledge of micro- and macro-economics and specialized areas of economic research, especially with a focus on their dissertation research. 1.2. Graduates understand the current fundamental economic problems, they can formulate expert opinions, alternatives for their solution and evaluate them. <p>2. Systematic knowledge and analytical method skills</p> <ol style="list-style-type: none"> 2.1. Graduates have such knowledge of analytical methods that they can critically evaluate any output of econometric research. 2.2. Graduates have such a level of analytical skills that they can design and implement an empirically focused research project based on the current level of knowledge from an international perspective and move it further. <p>3. Communication and publication skills in an international environment</p> <ol style="list-style-type: none"> 3.1. Students are able to publish their own research studies, to participate in project teams and lead research teams, to publish in peer-review journals and impact journals registered in the WoS or SCOPUS database. 3.2. Students are able to present expert and scientific knowledge of their own original research in front of the international scientific community, and there are able to hold seminars at universities.
The professions for which the graduate is prepared at the time of completion and the potential of the study programme from the point of view of graduate's employability	<p>The 3rd-degree study program Economics prepares graduates that are employable as specialists, lecturers, and professionals in the education sector (codes 231 ISCO 08) or in administrative, supportive and business activities (codes 242 ISCO 08), especially employed in the areas of strategy and development. Their knowledge, skills and competences allowing them to be employed at managing positions for strategy and planning in the business sector and managing and executive positions in research and education institutions (code 12 a 13 ISCO 08). The learning outcomes and qualifications obtained by completing the study program meet sector-specific professional expectations for the performance of the following professions:</p> <p>2310003 University and higher education assistant lecturer 2310004 Assistant professor 2310005 Lector at university 2422016 Research, development and innovation professional 2422001 Business strategy, planning and investments professional 2422008 Socio-economic development professional</p>
Relevant external stakeholders⁵	<p>Wirtschaftsuniversität Wien, University of Coimbra, University of Auvergne, IWI Wien, Research department of NBS, Prognostic Institute of the Slovak Academy of Science, Economic Institute of the Slovak Academy of Science.</p> <p>The written statement of the relevant interested parties is attached to the application.</p>
3. Employability	
Evaluation of the study programme graduates employability	X

⁵ In the case of regulated professions in accordance with the requirements for the acquisition of professional competence pursuant to a special regulation

If applicable, indicate the successful graduates of the study programme	X
Evaluation of the study programme quality by employers (feedback)	X
4. Structure and content of the study programme⁶	
The rules for the design of study plans within the study programme	<p>The study plan of the study program was created in accordance with the rules for the creation of study plans set out in the Study Regulations of the University of Economics in Bratislava (hereinafter "UE in Bratislava") and in the Principles of Creating a Recommended Study Plan.</p> <p>Representatives of students and employers cooperated in the creation of the study plan, and international compatibility and comparability with the study programs of prestigious foreign universities were also taken into account.</p> <p>The study plan determines the time and content sequence of subjects, assigned educational activities (lecture, exercise, seminar, consultations, etc.) and forms of evaluation of study results. Each subject is completed in an adequate form according to the nature of the subject. Specific criteria and forms of evaluation of study results are published in information sheets of individual subjects.</p> <p>The study plan was compiled in such a way that the student's workload and the number of contact teaching hours enable the achievement of the learning outcomes of the study program.</p> <p>Academic Regulations of the EUBA</p>
The recommended study plans for individual study paths^{7 8}	The study plan is attached to the application for accreditation of the study program.

⁶ Selected characteristics of the content of the study programme can be stated directly in the Course information sheets or supplemented by the information of the Course information sheets

⁷ In accordance with Decree no. 614/2002 Coll. on the study credit system and Act no. 131/2002 Coll. on Higher Education Institutions and on Amendments to Certain Acts

⁸ The study plan generally states:

- individual parts of the study programme (modules, courses, and other relevant school and extracurricular activities, if they contribute to the achievement of the required learning outcomes and allow to obtain credits) in the structure of compulsory, compulsory optional and optional courses,
- **profile courses** of the relevant study path (specialization) within the study programme,
- for each learning part/course the learning outcomes, related criteria and rules of their assessment so that the learning objectives of the study programme are met (they can be stated only in the Course information sheets, in the Learning outcomes section and in the Course completion requirements),
- prerequisites, co-requisites and recommendations for the design of the study plan,
- for each learning part of the study plan/course the applied educational activities (lecture, seminar, exercise, final work, project work, laboratory work, internship, excursion, field practice, professional practice, state exam, etc. or their combinations) suitable for achieving learning outcomes,
- methods by which the educational activity is delivered – present, distant, combined (in accordance with the Course information sheets),
- outline/syllabus of the course (during the assessment, teachers responsible for the course will allow the working group access to the study materials of the course and the content of individual educational activities),
- student workload ("extent" of individual courses and educational activities separately) (it is recommended indicating the workload of contact and non-contact teaching in accordance with the ECTS Users' Guide 2015,
- credits allocated to each part based on the learning outcomes achieved and the workload involved,
- the person responsible for the course (or a partner organization/person) with an indication of the contact details (E.g. when providing the professional practice or other educational activities carried out outside the university),
- course teachers (or participating partner organizations/persons) (may also be mentioned in Course information sheets),
- places where the courses are taught (if the study programme is delivered at several workplaces).

<p>The number of credits, the achievement of which is a condition for proper completion of studies other requirements that the student must meet within the study programme and for its proper completion, including the requirements for state examinations, rules for re-study and rules for the extension, interruption of study.</p>	<p>3. degree - 180</p>
<p>Other requirements that the student must meet within the study programme and for its proper completion, including the requirements for state examinations, rules for re-study and rules for the extension, interruption of study</p>	<p>To complete the study, the student must successfully:</p> <ul style="list-style-type: none"> • complete all courses specified in the study plan and obtain the prescribed number of credits, • obtain the prescribed number of credits for Creative activity in the field of science, • defend the final thesis and, • take the state exam according to the given study program. <p>Further conditions and rules of study are set out in the Study Regulations UE in Bratislava. Academic Regulations of the EUBA</p>
<p>The requirements for completing the individual parts of the study programme and the student's progress within the study programme</p>	
<p>Number of credits for compulsory courses required for proper completion of studies/completion of a part of studies</p>	<p>45</p>
<p>Number of credits for compulsory optional courses required for the proper completion of studies/completion of a part of studies</p>	<p>60 (Creative activity in the field of science)</p>
<p>Number of credits for optional courses required for the proper completion of studies/completion of a part of studies</p>	<p>15</p>
<p>Number of credits for the final thesis and the defense of the final thesis required for the proper completion of studies</p>	<p>60 (Dissertation thesis project and dissertation exam, and Dissertation thesis and its defense)</p>
<p>Number of credits for professional practice required for the proper completion of studies/completion of a part of studies</p>	<p>0</p>
<p>The rules for verification of learning outcomes, students assessment and the possibilities of appealing against the assessment</p>	<p>Each subject of the study program has clearly defined methods and criteria for evaluating the achieved learning outcomes in accordance with Art. 8 and 9 of the Study Regulations UE in Bratislava and are listed in the information sheet of the course. Assessment methods and criteria reliably represent the level of all learning outcomes in the course and at the same time guarantee that each successful graduate of the course has achieved all the required learning outcomes.</p> <p>The final part of the study is also a mandatory part. The uniform procedure for processing, control of originality, registration, storage and access to final theses is regulated by a separate internal directive UE in Bratislava.</p> <p>The condition for successful completion of the study program is also the completion of the state examination and the defense of the final thesis before the commission for state examinations. Further information regarding the state examination is provided in Art. 14 of the Study Regulations UE in Bratislava.</p> <p>The student has the opportunity to use the means of redress against the results of the evaluation in accordance with Art. 8</p>

	Study Regulations UE in Bratislava. Academic Regulations of the EUBA
Conditions for recognition of studies or a part of studies	The rules for the recognition of studies or parts of studies are regulated by Art. 10 of the Study Regulations UE in Bratislava. Academic Regulations of the EUBA
The topics of final theses of the study programme	The list of the final thesis topics is attached to the application for accreditation of the study program.
Rules for the assignment, processing, opposition, defense and evaluation of final theses in the study programme	<p>A mandatory part of the study is also the final dissertation thesis, which has the character of a scientific written work, the basis of which is the original research of the doctoral student. With it, the doctoral student demonstrates the ability and readiness for independent scientific and creative activity in the field of science. Doctoral students are led by supervisors. The position of the supervisor for a given study program may be performed by the teachers of the university where the doctoral study is carried out and other experts after approval by the Scientific Board of the FNE UE in Bratislava. The supervisors of doctoral study at the university may be university teachers with the scientific-pedagogical title of professor or associate professor, visiting professor, or researchers with scientific qualification degree I or IIa, or teachers and researchers with the title of DrSc., or with the equivalent of these titles. The function of supervisor for topics offered by an external educational institution can be performed by supervisors approved by this institution. The external educational institution will provide the Scientific Board of the FNE UE in Bratislava with the scientific and pedagogical characteristics of the supervisor. The supervisor and the dissertation thesis annotation are appointed and approved by the dean of the FNE UEBA. Supervisors professionally guarantee the scientific part of the doctoral study.</p> <p>Process of creating the offer of the final dissertation thesis:</p> <ul style="list-style-type: none"> • proposal of the final thesis topics by supervisors of doctoral study at FNE UE in Bratislava and external educational institutions, respecting the principles of creating and approving dissertation topics for the 3rd-degree study at FNE UE in Bratislava • discussion of the final thesis topics at the relevant department, or external educational institution • approving the final thesis topics in the relevant commissions for doctoral study • assignment of the final thesis to the AIS2 system with the indication of the title, goal, annotation, study field and program, • publication of the offer of the final thesis, • registration of applicants for the doctoral study via the electronic application on a specific topic of the final thesis in AIS2, • elaboration of the final thesis within the scientific part of the doctoral study in cooperation with the supervisor, • submission of the final thesis according to the instructions of the department to which the doctoral student is assigned. <p>The supervisor proposes three opponents of the dissertation thesis from the personalities of the study field. Only one of the opponents can be from the FNE UE in Bratislava as a home institution, at least one of them is a professor or a prominent researcher - Doctor of Science and at least one opponent has to be a member of a commission for doctoral study with a scientific-pedagogical degree of an associate professor or higher. It is recommended to have one opponent from abroad with an academic degree of PhD., or CSc. (or the equivalent of completed university education of the 3rd degree) or higher, while the relevant commission for doctoral study may make changes to the proposal. The dean of the FNE UE in Bratislava no later than 30 days after the opinion of the relevant commission for doctoral study appoints three opponents of the dissertation thesis. The opponent's report contains an objective and critical analysis of the advantages and disadvantages of the submitted dissertation thesis. The reviewer comments mainly on the determination of the goal and the degree of its fulfillment, the suitability of the methods used, the methodology, the evaluation of the</p>

	<p>knowledge base, the scientific contribution and the originality of the thesis, the application benefits of the thesis for practice. At the same time, the report will also include questions that should be reflected by the doctoral student at the defense of the thesis. Each opponent clearly states in the opponent's report whether he recommends the thesis for defense or not and whether he proposes the award of PhD. academic degree, based on the result of the defense of the submitted dissertation, or not.</p> <p>The condition for successful completion of the study program is also the completion of the state examination and the defense of the final thesis before the commission for state examinations. Further information regarding the state examination is provided in Art. 14 of the Study Regulations UE in Bratislava. The detailed procedure of the process of submitting, processing, opposing and defending the final thesis is regulated by the Internal Directive no. 11/2019 on final, rigorous and habilitation theses.</p> <p>Internal Directive No. 11/2019</p>
<p>Opportunities and procedures for participation in student mobility</p>	<p>Students have the opportunity to participate in a variety of short-term as well as long-term study stays abroad. The most popular forms of mobility programs include:</p> <ul style="list-style-type: none"> • Erasmus + study in EU countries • Erasmus + internship • Erasmus + study in countries outside the EU • Central Europe Connect (CEC) • CEEPUS • National Scholarship Program <p>All information about study stays, as well as instructions on how to proceed in the individual phases of the study stay, are published at:</p> <p>Erasmus+ Mobilitné programy Kritériá na Erasmus+ študentské mobility</p>
<p>Rules for adherence to academic ethics and rules for drawing consequences</p>	<p>The rules of observance of academic ethics are defined in the internal directive no. 9/2014 Code of Ethics for Scientific Research Activities of a University Teacher and Researcher UE in Bratislava. In case of violation of research integrity (especially in the form of plagiarism) by students, the procedure is in accordance with the Disciplinary Code for students UE in Bratislava.</p> <p>Code of Ethics Ethical Management Disciplinárny poriadok pre študentov EU v Bratislave</p>
<p>Procedures applicable to students with special needs</p>	<p>The UE in Bratislava offers students with special needs appropriate adaptations and support services during their entire studies at the UE in Bratislava. Comprehensive information for applicants as well as students with special needs is published on the EU website in Bratislava.</p> <p>Študent so špecifickými potrebami Primerané úpravy a podporné služby Interná smernica č. 5/2020</p>
<p>Procedures for filing complaints and appeals by students</p>	<p>Students have the opportunity to give suggestions in particular:</p> <ul style="list-style-type: none"> • in the form of an anonymous student survey, in which students evaluate the educational process as well as individual subjects. Students receive feedback on the measures taken to eliminate any identified deficiencies, • in the form of meetings of the faculty management with student representatives, • in the form of written suggestions addressed to individual vice-deans, • in addition, they have the possibility to proceed in accordance with the internal directive no. 12/2010 on the handling of complaints. <p>Interná smernica č. 2/2011 Monitorovanie a hodnotenie kvality Interná smernica 12/2010 o vybavovaní sťažností</p>

In each of them, there are 16 students and one teacher computer with a printer and data projector.</p> <p>1 computer room Capacity 24 places (2B01) for individual work of students</p> <p>1 computer room Capacity 24 places (3B01) for individual work of students</p> <p>1 computer room Capacity 20 places (4B01) for individual work of students</p> <p>1 computer room Capacity 24 places (5B01) for individual work of students</p> <p>1 computer room of a specialized workplace of the Slovak Center of Training Companies with a capacity of 15 seats (4C14) for individual work of students.</p> <p>The specialized workplace of the Slovak Center of Training Companies and the Mobile Education Center at the Department of Pedagogy have 5 laptops, 1 desktop PC and 2 printers available.</p> <p>All computers are connected via a high-speed optical network to the Internet and Intranet, speed 1Gb / s</p> <p>In the premises of the Slovak Economic Library of the UE in Bratislava (SEL), there is a team space for group and/or individual study: https://sek.euba.sk/sluzby/timovka</p>
<p>Characteristics of the study programme information management</p>	
<p>Access to study literature according to Course information sheets, access to information databases and other information sources</p>	<p>The Slovak Economic Library of the UE in Bratislava (SEL) is a university-wide academic library that provides basic and advanced library information services, acquires and makes available information resources in accordance with the content profile of the UE in Bratislava, creates and manages a database of articles. Students have access to study literature either in person at the SEL premises (scientific and professional Slovak and foreign journals and newspapers are available in the journal study room, while students find books, textbooks, scripts, statistical yearbooks, collections of laws, European Union publications in the general study room) or in electronic information sources. Within the range of IP addresses of the university and selected dormitories, it is possible to search all sources via the EBSCO Discovery Service (licensed databases, freely available world databases and the library's online catalog).</p> <p>A detailed overview of the databases is given here: Resources https://sek.euba.sk/veda-a-vyskum/karentovane-casopisy-v-sek</p>
<p>Access to information technologies</p>	<p>Wifi connection is provided in all EUBA premises. Computers for students are available in four computer classrooms. Access to information technologies is also provided in the SEK study room (computers, scanners) and students can also use the premises and services of the student parliament (borrowing a data projector).</p> <p>Licenses are installed in individual rooms according to the requirements of individual faculties, such as: Stata, SPSS, R, STATGRAPHIC Plus, SAS, EVIEWS.</p>
<p>Characteristics and extent of distance education applied in the study programme with the assignment to courses</p>	<p>The study program will be primarily provided by full-time education. Distance education in the study program is provided on subjects in terms of internationalization and increasing the quality of the educational process, in order to involve experts and experts with foreign affiliation in the pedagogical process. Distance education is provided in the MS Teams environment, with created electronic materials and study groups.</p>
<p>Access, manuals of e-learning portals</p>	<p>E-learning Návody</p>

<p>Procedures for the transition from contact teaching to distance learning</p>	<p>Distance learning will take place online through online learning platforms. The priority platform is MS Teams and also the Moodle platform, to which students and teachers have secure access. To facilitate the transition to online teaching, detailed instructions for working in MS Teams have been created and NHF EU teachers in Bratislava have the opportunity to participate in training organized by the Information Technology Center UE in Bratislava: E-learning</p>
<p>Institution partners in providing educational activities for the study programme and the characteristics of their participation</p>	<p>The study program Applied Economics is presented as a new program, therefore the declared cooperation in practice is based on the existing cooperation in the departments that will provide this program. We plan to use this cooperation also within the framework of the presented new program.</p> <p>Collaborating institutions will participate mainly in invited lectures within individual subjects, providing internships and professional practice as well as joint research activities. At the same time, these institutions are the primary employers who need graduates of this study program, which also ensures the applicability of these graduates.</p> <p>Practice is adequately represented on the Program board. The Social Insurance and Pension Savings Section of the Ministry of Labor and Social Affairs of the Slovak Republic, the Institute for Financial Policy at the Ministry of Finance of the Slovak Republic, the Institute of Administrative and Security Analyzes of the Ministry of the Interior of the Slovak Republic, the Implementation Unit at the Government Office of the Slovak Republic, Central European University, Wirtschaft University Wien, University of Coimbra, Research department of NBS, Prognostic Institute of the Slovak Academy of Science, Economic Institute of the Slovak Academy of Science. These institutions have their own analytical units and graduates of the program can find their application in these institutions, which is one of the main goals of this program.</p> <p>In addition, the departments cooperate with various other institutions, or universities at home and abroad, where we anticipate continued cooperation on the new program.</p>
<p>Characteristics of the possibilities for social, sports, cultural, spiritual and social activities.</p>	<p>In addition to providing higher education, the faculty offers students a number of extracurricular activities in many areas. From the point of view of increasing the qualifications and skills of students, emphasis is placed on supporting talented and active students, especially through the organization of various professional events and workshops such as Data Science Community University Club, Investors Club, National Bank of Slovakia workshop and others.</p> <p>To support a healthy lifestyle and support sports, we regularly organize joint tourism, running students and students also have at their disposal numerous university sports facilities. There is also a folklore ensemble Ekonóm, where students can realize themselves.</p> <p>The faculty is also aware of its social responsibility in relation to the education of young people to environmental responsibility and the application of ecological solutions. In this area, the submission of paper-based seminars has been abolished, and various environmental initiatives aimed at environmental awareness are also supported in support of waste separation.</p> <p>The Student Parliament of FNE UE in Bratislava also participates in the organization of various extracurricular and social events. Such events may also include the organization of beasts, breakers and other activities intended for cultural and social activities.</p>
<p>Possibilities and conditions for participation of the study programme students in mobilities and internships (indicating contact details), application</p>	<p>The FNE, UE in Bratislava publishes up-to-date information on new challenges on its website. Registration for ERASMUS + mobility takes place online via the Study Abroad portal. The exact sequence of steps is given here: Erasmus+ prihláška</p> <p>After uploading the necessary data and documents and sending the application, an oral interview with the candidates will take place. The overall result is influenced by the student's learning outcomes,</p>

instructions, rules for recognition of this education	<p>his / her written and oral expression, as well as motivation to complete the mobility.</p> <p>The recognition of studies is carried out in accordance with Art. 10 of the Study Regulations UE in Bratislava and the Principles of Recognition of Studies of Students Abroad at FNE, UE in Bratislava.</p> <p>Kritériá na Erasmus+ mobility Zásady uznávania štúdia v zahraničí Možnosti štúdia v zahraničí Academic Regulations of the EUBA</p>
9. Required abilities and admission requirements for the study programme applicants	
Required abilities and necessary admission requirements	<p>The basic condition for admission to study is the completion of the study program of the 2nd degree and the successful completion of the entrance examination.</p> <p>The content of the professional entrance examination for doctoral studies is the assessment of the applicant's knowledge of the issue, which is the content of the topic of the dissertation, to which the applicant applies. In addition, knowledge of English is required. The content of the entrance exam in English is the assessment of communication competence in the relevant language.</p>
Admission procedures	<p>Applicants apply electronically exclusively through the Academic Information System UE in Bratislava.</p> <p>The dean of the FNE UU in Bratislava decides on the form and manner of conducting the entrance examination with the consent of the chairman of the relevant sub-professional commission of the FNE UE in Bratislava. The professional entrance examination takes place in front of an examination commission, which has at least 3 members, nominated by the chairman of the relevant sub-professional commission. At a closed session, the examination commission evaluates the course and evaluates the result of the professional entrance examination, evaluates the candidate with the appropriate level of the classification scale. The result of the entrance exam in English will be evaluated by a representative of the Faculty of Applied Languages of the UE in Bratislava at the appropriate level of the classification scale.</p> <p>The admissions committee, composed of the vice-dean for science and doctoral studies and the chairmen of the examination commissions, will comprehensively evaluate the results of the candidates achieved at the entrance examination and submit to the dean a proposal for admission / non-admission of doctoral students. The Admissions Committee shall justify the selection of candidates and the criteria it has taken into account in its decision. These conditions result from the valid principles of the admission procedure for the 3rd degree of study.</p>

10. Feedback on the quality of provided education	
Procedures for monitoring and evaluating students' opinions on the study programme quality	<p>In each semester, students have the opportunity to comment on the quality of teaching through an anonymous questionnaire. They evaluate both the subjects taught and the teachers of individual subjects. This information represents an important source for the program board of the study program - feedback from students on the quality and importance of subjects included in the study plan of the study program.</p>
