

## Description of the study programme – outline<sup>1</sup>

<b>Name of the higher education institution</b>	University of Economics in Bratislava	
<b>Address of the higher education institution</b>	Bratislava, Dolnozemska cesta 1	
<b>Identification number of the higher education institution</b>	00399957	
<b>Name of the faculty</b>	Obchodná fakulta	
<b>Address of the faculty</b>	Bratislava, Dolnozemska cesta 1	
<b>Institution body for approving the study programme</b>	Quality Assessment Committee at the EU in Bratislava	
<b>Date of the study programme approval or the study programme modification</b>	DD. MM. RRRR	
<b>Reference to the results of the latest periodic review of the study programme by the institution</b>	vložte odkaz	
<b>Reference to the assessment report of the application for accreditation of the study programme under § 30 of Act no. 269/2018 Coll.</b> (It is stated only if the accreditation of the study programme has been granted according to § 30 of Act no. 269/2018 Coll.)	vložte odkaz	
<b>1. Basic information about the study programme</b>		
<b>Name of the study program and its number according to the register of study programmes</b>	Manažment medzinárodného podnikania 101371	
<b>Degree of higher education and ISCED-F education degree code<sup>2</sup></b>	third - 864	
<b>Place(s) of delivery of the study programme</b>	Bratislava	
<b>Name and number of the field of study in which higher education is obtained by completing the study programme, or a combination of two fields of study in which higher education is obtained by completing the study programme, ISCED-F codes of the field/fields</b>	8 - Economics and management  ISCED-F code: 0413 ISCED-F code: 0311 - Economics	

<sup>1</sup> The Faculty compiles a description of the study programme as an annex to the application for change of the study programme.

- When submitting an application pursuant to § 30 (1) of Act no. 269/2018 Coll. the higher education institution states in the description only the data available at the time of application.
- Once the accreditation (or the internal approval of the study programme by the institution programme approval authority with the right to design programmes within the given field and degree) has been granted, the institution permanently makes the description available to the stakeholders of the study programme.
- The institution may choose the form of processing, visualization, and publication of the description, suitable for students, teachers and another users.
- In individual parts of the description, the institution may refer to another internal document that sufficiently describes the relevant area and is publicly available.
- In individual parts of the description, the institution may refer to a place in the information system which contains the relevant up-to-date information.
- The institution ensures that the description is up-to-date (if the change in the description is in the nature of a modification of the study programme and the change is made in accordance with § 30 (9) of Act No. 269/2018 Coll., the institution makes the change and publishes it only after approval by the Agency).

<sup>2</sup> Code 768 is used in the case of study programs with the degree of "master" and the possibility to take a rigorous examination

<b>Type of the study programme</b>		academically oriented
<b>Awarded academic degree</b>		philosophiae doctor ("PhD.")
<b>Form of study</b>		external
<b>In the case of joint study programmes, cooperating institutions and the range of study obligations the student fulfills at each of the given institutions</b> (§ 54a of the Act on Higher Education Institutions).	uvedte spolupracujúce vysoké školy uvedte študijné povinnosti na tej ktorej vysokej škole (v anglickom jazyku)	
<b>Language or languages in which the study programme is delivered<sup>3</sup></b>		English Slovak
<b>Standard length of the study expressed in academic years</b>		4 years
<b>Capacity of the study programme</b> (planned number of students)		10
<b>The actual number of applicants</b>		1
<b>The actual number of students</b>		5 to 31 December 2021
<b>2. Graduate profile and learning objectives<sup>4</sup></b>		
<b>Graduate profile</b>	<p>A graduate of the study program Management of International Business is profiled as a highly qualified expert able to work in an academic or international corporate environment with a scientific qualification in the field of international trade and international business. A graduate has deep theoretical knowledge corresponding to international scientific criteria and has comprehensive knowledge of company management in the international environment in the age of globalization and digitization. A graduate knows current trends in international trade and business, in the field of economic integration and regional cooperation, in territorial studies, methods of engaging companies in the international environment, in e-commerce and e-business in the current context of the globalized environment of international business. A graduate has analytical skills, the ability to collect and evaluate data from international databases, uses methods of scientific work and relevant software, can process analytical materials at the scientific level, evaluate and use them for the development of knowledge in the field. A graduate can be employed in analytical and specialized workplaces in the field of international business and trade, economic and trade diplomacy, the EU bodies, multinational companies, international governmental and non-governmental organizations, financial institutions, scientific research and academic institutions and state administration bodies with international agenda requiring a comprehensive solution to problems by engaging scientific research approaches.</p> <p>A graduate of the study program Management of International Business will support social progress in the knowledge society, and its research will contribute to expanding the boundaries of scientific knowledge by publishing outcomes at the national and international level.</p>	

<sup>3</sup> It means the languages in which all learning outcomes are achieved and all related courses of the study programme as well as the state examinations are carried out. The institution independently provides information on the possibility of partial study parts/courses in other languages in part 4 of the description.

<sup>4</sup> Learning objectives are achieved in the study programme through measurable learning outcomes in individual parts (modules, subjects) of the study programme corresponding to the relevant level of the Qualifications Framework in the European Higher Education Area

**Learning objectives**

(student's abilities at the time of completion of the programme and the main learning outcomes)

The goal of the education in the study program is:

- gaining relevant knowledge in the field of international business management, including current scientific theories and approaches,
- mastering effective work with databases of data and scientific works in the field, the ability to evaluate theories, concepts of innovation in their original scientific research,
- mastering the relevant use of a wide range of methods of scientific work,
- acquiring the ability to conceptually solve complex problems in the field in the dynamic development of knowledge and to present the results of research to the international scientific community

The outcomes in the field of knowledge will be ensured mainly by completing compulsory subjects of the study part (Methodology of Scientific Work, Applied Research Methods, International Business and Integration processes, International trade - current issues, Strategy and management of international business and one of the four courses selected according to student interest and focus).

The outputs in the field of skills will be ensured mainly by completing the subjects Methodology of Scientific Work, Applied Research Methods, Strategy and Management of International Business, elective subject and at the same time by completing the scientific part of the study plan (part Project of Dissertation thesis and dissertation exam, part Creative activity in the field of science, part Dissertation thesis and its defense as well as project activity).

The outputs in the field of competences will be provided by completing the scientific part of the study plan (Projet of Dissrtation thesis and dissertation exam, part Creative activity in the field of science, part Dissertation thesis and its defense as well as project activity).

The output of the study and scientific part of the program is in the type of output "knowledge":

- comprehensive mastery of the issue and acquisition of in-depth knowledge in the field of evaluation of macroeconomic aspects and current theories of international trade, business and international economic integration concerning the management of the international business,
- understanding current trends and scientific approaches in international trade and the issue of global value chains at the evaluation level,
- identification of current managerial problems of trends in international business of multinational companies,
- mastery of quantitative and qualitative methods of scientific work, and on the basis of achieving the ability of independent creative scientific activity in the field of study - the graduate is qualified to work in education, research, international business and consulting for top management of international companies at the evaluation level.

The output of the study and scientific part of the program is in the type of output "skills":

- the ability to identify world scientific and innovative developments in the field, as well as the use of relevant research and development practices,

- ability to formulate new hypotheses, judgments and strategies for further development of scientific field or managerial practice, to implement own research, project and working procedures at a level corresponding to international criteria,
- acquisition of primary and secondary data sources, their critical analysis and use in theory and in practical applications important for the field development,
- application of conclusions and findings of one's scientific research at the level of a complex to interdisciplinary nature and formulation of conclusions and recommendations.

The output of the study and scientific part of the program is in the type of output "competence":

- Demonstration of systematic skills in the field of study and mastery of skills and research methods in the topic,
- analytical and critical thinking as a prerequisite for independent, creative work of a doctoral student in the conceptual solution of new problems concerning ethical, environmental, social and other aspects of scientific research,
- management of extensive research tasks and teams, presentation of own outputs and conclusions of scientific, research and project work before the scientific community at the national and international level,
- ability and readiness of the doctoral student to answer questions or promptly respond to a professional discussion in the field of international business, solve problem-oriented tasks using scientific tools, present and defend them at the international level (doctoral student has at least C1 level in at least one foreign language).

The specific outputs of the study program can be quantified and materialized in the form of credits for the study and scientific part of the program (see study plan) and evaluation of doctoral student performance by teachers, supervisors and relevant commissions (colloquia, state commission, final thesis defense commission). The output of the scientific part of the doctoral study is a wide range of publication outputs in a prescribed point structure and with threshold values with an emphasis on publishing in an international environment. The doctoral student is able to competently incorporate the comments of opponents in the publication outputs, publicly present the scientific outputs of their work, lead independent scientific seminars and selected lectures in their thematic profile. The scientific activity of the doctoral student is divided into the elaboration of the dissertation thesis project, its creation and defense. In addition to this rigid structure, the doctoral student publishes the results of own research at scientific conferences, in scientific journals or monographs, as prescribed by the study plan and as it is determined in it, the evaluation of its outputs in the form of credits.

In order to strengthen the scientific part and its flexibility, as well as to increase skills and competencies according to the specific interest and focus of the student and by the best practice of world universities, he will be offered by the opportunity to choose a consultant (co-advisor) from among professors and associate professors of Department of International Trade of EUBA

	<p>Faculty of Commerce in agreement with the supervisor. The training workplace - The Department of International Trade of the EUBA currently has significant academic and scientific potential, consisting of two professors, eight associate professors and a number of assistant professors. The integration of doctoral students into this inspiring environment will be, in addition to the classic tools of working with doctoral students according to the study plan, another guarantee of the development of their knowledge, skills and especially scientific research and pedagogical competencies.</p> <p>Along this line, in collaboration with the particular faculties and the cross-university departments, the Department of International Trade will vigorously promote the international mobility of doctoral students and their participation in tutorials organized before the major world and European conferences in the field.</p> <p>If participation is not possible, the department and the program board will organize international doctoral tutorials online with experienced foreign colleagues from partner universities, e.g. from the University of Economics in Prague, WU Wien, WHU Koblenz, etc. The Department of International Trade and the Program Board will further initiate and organize university-wide and faculty scientific-research seminars for doctoral students to share their research, projects, and best practices.</p> <p>The teaching and cooperation methods that will take place in the education of doctoral students through which the necessary knowledge, skills and competencies will be achieved are as follows: classical full-time, distance (online), in case of objective need (prolonging the pandemic situation, teaching foreign students), as well as combined, when the full - time one coincides with the distance (in the case of the involvement of visiting professors from abroad, opinion formers, leaders and experts from practice, organization of international tutorials, etc.).</p>
<p><b>The professions for which the graduate is prepared at the time of completion and the potential of the study programme from the point of view of graduate's employability</b></p>	<p>After graduation, the student is prepared mainly for the following professions: 1223 - Research and development managers, 2310 - University teachers.</p> <p>Besides that, we also list the following professions as a potential position of our graduates:</p> <ul style="list-style-type: none"> <li>• Director of a company operating in an international environment,</li> <li>• Consultant providing services to internationally active companies,</li> <li>• University teacher, researcher,</li> <li>• Senior civil servant not mentioned elsewhere,</li> <li>• The head of the office, the secretariat of the central state body,</li> <li>• Adviser to the President, Prime Minister, Minister, Supreme Representative of a central state body,</li> <li>• State Secretary,</li> <li>• CEO (president of the company),</li> <li>• Executive Director,</li> </ul>

	<ul style="list-style-type: none"> <li>• Member of the Board of Directors and other management body of the company,</li> <li>• Manager for training and development of employees,</li> <li>• Personnel administration and employee relations manager (manager),</li> <li>• Investment manager,</li> <li>• Business manager (sales director),</li> <li>• Marketing manager,</li> <li>• Manager in the field of market research,</li> <li>• Logistics manager,</li> <li>• Reporting specialist,</li> <li>• Expert advisor and consultant in the field of banking products and services,</li> <li>• Specialist in international banking relations,</li> <li>• Public administration specialist in the field of international relations,</li> <li>• Financial Markets Operations Specialist,</li> <li>• Specialist trader in financial markets,</li> <li>• Financial market regulation specialist,</li> <li>• Researcher in the field of banking,</li> <li>• Manager in other financial services,</li> <li>• Capital market manager.</li> </ul>
<b>Relevant external stakeholders<sup>5</sup></b>	
<b>3. Employability</b>	
<b>Evaluation of the study programme graduates employability</b>	podklad dodá kancelária kvality (v Aj)
<b>If applicable, indicate the successful graduates of the study programme</b>	<p>During the more than half a century of doctoral programs at this department, their graduates have held the positions of members of governments, ministers, secretaries of state, ambassadors and diplomatic staff abroad and at international institutions such as the UN, WTO, European Commission, etc., managing directors of international companies and banks, deans and vice-rectors of higher education institutions, researchers, etc.</p> <p>Among the significant and successful graduates of the accredited III. degree study programs in the past are:</p> <ul style="list-style-type: none"> <li>• Prof. Dipl. Ing. Peter Baláž, PhD. ; served as Head of the Department of International Trade of the</li> </ul>
